

KIT 2016: Halifax, Nova Scotia April 27

27 April 2016 | 9 AM - 12:00 PM

Agenda

Capacitor Design & Characteristics

For each component type we will discuss the materials used in the design, how differences in construction techniques affect their performance, and important characteristics to consider in your design.

- Ceramic Capacitors
- Tantalum Polymer
- Small Case Supercapacitors
- Aluminum Polymer
- Aluminum Electrolytic Capacitors
- Flex Suppressor Sheets
- Metal Composite Inductors
- Films

Application Areas

Applying the information learn in the previous sections, discussions focus on how to apply those characteristics to real-world applications.

- Low Voltage DC and K-SIM

Arrow Electronics, Inc.
155 Chain Lake Drive
Suite 27
